API

PAL

You!

Benefits

- Reactive
- 1000x faster
- "Closes the loop"
- Responsive front end
- Easier to test
- Single technology front to back - reduces cognitive load
- all of which means faster to change

New!

- auto allocation ties in better with shifts which can be tied to a terminal
- API in UI
- Shifts durable storage
 - LHR
 - LTN
- EMA

Coming up

- In no particular order
 - What's more important?
 - Size remaining live MVP
 - What's forecast look like?
